Thaumatrope Craft:

Materials - Crayons or markers, cardboard or stiff paper circles, wooden rod, glue or tape, hole puncher.

Steps:

1. Cut out 2 circles of the same size Cardstock is preferable but construction paper works just as well.
2. Draw two different images on the circles. These images should go together in some way.
3. Glue or tape the two different circles onto the wooden rod.
4. Rotate the wooden dowel in your hand, or spin the circles with the lengths of string. Watch as the image turns from two images into one complete picture!
